

## Product Datasheet

## FOLAJET PP-WO

### White Opaque PP Film for Ink Jet Printers

FOLAJET PP-WO is a Polypropylene film with a matt white coating on one side, particularly suited for printing with pigment inks. The coating is characterized by an excellent water fastness and wet smear resistance and is thus also suited for applications such as advertising prints in outdoor applications.

#### Characteristic

- Suitable for Thermal printers
- Suitable for Piezo printers
- Suitable for Pigment Ink which offers improved light
- Suitable for Dye Ink
- Fast dry coating
- Improved water resistance
- Brilliant Colour Vibrancy
- Good scratch resistance
- Good flatness, flexibly ductile
- Good ink absorption
- Excellent outstanding durability of the prints when using pigmented inks

#### Finish

- Matt white Surface

#### Specifications

- |                     |                 |
|---------------------|-----------------|
| • Coating frontside | For Ink Jet     |
| • Print side        | Matt-White side |
| • Base material     | Polypropylene   |

#### Compatibility

- Useable on most large-format Ink Jet printers using Pigmented ink systems. Limited suitability with when using dye inks.
- Not compatible with oil and solvent based systems.

#### Handling

- A preconditioning period of 24 hours within the printing environment is recommended.
- Ink Load: approx. 260 - 300% (may vary according to ink system).
- Print side = matt white side
- Between 15-30°C and 30-70% r.h.
- Printer Mode: photo quality, coated paper, o.e.
- Avoid fingerprints on printing side.

#### Storage

- Store in a cool and dry place
- Shelf life min. 1 year after delivery (under recommended storage conditions).
