### Self Adhesive Cling Film for Ink Jet Printers

A top coated clear static cling film for high resolution photographic posters, mock ups, signage, decals, point of sale displays, signs and labels. A soft back layer clings without any adhesive to clean smooth surfaces like glass, plexi-glass, polished metal or furniture. This film can be repositioned without leaving any adhesive residue. It gives excellent flatness and colour contrast reproduction even when using high levels of ink, reducing the possibility of material distortion. The film offers excellent handling, tough dimensional stability and is tear resistant. Images dry quickly.

#### Characteristic

- Suitable for Thermal printers
- Suitable for Dye Ink
- Fast dry coating
- Can be repositioned without permanently bonding to surfaces
- Good flatness
- Clings to smooth surfaces like glass, plexi etc.
- High resolution
- Tear resistant
- No bleeding

#### Finish

- Clear transparent

#### Specifications

- |                     |                |
|---------------------|----------------|
| • Coating frontside | For Ink Jet    |
| • Print side        | Glossy side    |
| • Back side         | Release liner  |
| • Base material     | Polyester film |

#### Compatibility

- Not compatible with oil and solvent based systems.
- Suitable for most Ink Jet Plotters using waterbased dye inks.

#### Handling

- A preconditioning period of 24 hours within the printing environment is recommended.
- Between 15-30°C and 30-70% r.h.
- Avoid fingerprints on printing side.

#### Storage

- Store in a cool and dry place
- Shelf life min. 1 year after delivery (under recommended storage conditions).
