# Laser 1 Opaque Laser Paper
## APPLICATION INSTRUCTIONS

Laser Opaque Heat Transfer Paper for Color / Dark T-Shirts, SKU LASEROPAQUE

| 350° F | 15-20 Seconds | Medium Pressure | Cold Peel |
|---|---|---|---|

## PRINTING INSTRUCTIONS

- For OKI 831TS, OKI 920WT and OKI 711WT: set the media type setting to Ultra Heavy 3

- For any other printer: Set the paper weight setting to Transparency or Label (usually the heaviest setting in the printer driver is most compatible)

- Print image on the blank, white side of the paper in the correct orientation: do NOT mirror/reverse the image.

- The paper should be fed into copier/printer with the short dimension first, ideally using a straight path bypass tray.

- We recommend single sheet feeding

### Cut and Peel

- For best results trim away the unprinted paper around the image by hand or with a vinyl cutter.

- Gently peel the image off of the backing carrier like a sticker. Using an Xacto blade or a vinyl weeding tool is helpful to get easy separation of the layers.

## APPLICATION INSTRUCTIONS

### Heat Press

**1.** Prepare heat press at 350° F.

**2.** Do NOT pre-press the garment.
